Practice Set A

Core concepts | October 2026 revision

75 minutes / 50 marks

Name: _____ Section: _____

Original practice questions, not an official examination or an authentic past-year paper. Answer ALL 30 MCQs in Section A and ALL 5 structured questions in Section B.

Suggested timing: Section A 35 min | Section B 35 min | Check 5 min

Section A answer sheet

Question	Answer	Question	Answer	Question	Answer
1		11		21	
2		12		22	
3		13		23	
4		14		24	
5		15		25	
6		16		26	
7		17		27	
8		18		28	
9		19		29	
10		20		30	

Score: Section A _____ / 30 Section B _____ / 20 Total _____ / 50

How to use this paper

Try it before opening the answer guide. For each mistake, write one corrected idea. Use the course's three-phase model when answering technological-evolution questions.

One topic I need to revisit: _____

Section A | Multiple choice

Questions 1-6 / 1 mark each / Choose ONE best answer.

01. A community trains enough engineers to maintain a safe water supply. Which obligation does this best illustrate?

A. Fardu kifayah
B. A duty limited to religious teachers
C. A personal hobby
D. Fardu ain

02. A village wants to reduce ignorance among its young people. Which action most directly supports this aim?

A. Discourage questions
B. Provide accessible education
C. Replace learning with entertainment
D. Limit access to books

03. The Latin root scientia helps explain science as a form of what?

A. Handicraft
B. Political authority
C. Knowledge
D. Religious ceremony

04. Which claim is suitable for a scientific investigation?

A. A claim protected from every possible test
B. A claim that can be checked using observations
C. A claim supported only by a famous person
D. A claim accepted only because it is popular

05. A student links the Greek term techne to making a tool by hand. Which meaning is closest?

A. A moral command
B. Art or craft
C. A scientific law
D. A written argument

06. Which set contains only intellectual activities identified in scientific methodology?

A. Observation, hypothesis, description, generalization
B. Observation, advertising, description, imitation
C. Description, guessing, sales, repetition
D. Hypothesis, popularity, secrecy, generalization

Section A | Multiple choice

Questions 7-12 / 1 mark each / Choose ONE best answer.

07. In the course account of Islamic methodology, which belongs to the non-empirical category?

A. Measuring temperature
B. Inspiration and kashf
C. Recording observations
D. Performing a controlled experiment

08. A student says, "Learning engineering can have no religious value because it is worldly knowledge." What is the best correction?

A. Every Muslim must become an engineer
B. Engineering replaces religious duties
C. Only religious teachers may learn engineering
D. Beneficial scientific learning can carry religious responsibility

09. Which trio matches the three philosophy-of-technology approaches listed in the course?

A. Ontological, commercial, political
B. Epistemological, anthropological, ontological
C. Anthropological, sociological, commercial
D. Epistemological, sociological, ontological

10. A technology team checks whether its methods are permissible or prohibited in Islam. Which pair guides this check?

A. Supply and demand
B. Profit and loss
C. Halal and haram
D. Tradition and popularity

11. Why did translating works from earlier civilizations support scientific growth?

A. It removed the need for skilled scholars
B. It made existing knowledge available for further study
C. It proved that new research was unnecessary
D. It stopped cultural contact

12. Which activity best reflects the intellectual spirit of the Islamic Golden Age?

A. Seeking knowledge across different scholarly traditions
B. Restricting learning to inherited stories
C. Rejecting every foreign book
D. Preventing discussion between scholars

Section A | Multiple choice

Questions 13-18 / 1 mark each / Choose ONE best answer.

13. A display groups Hippocrates, Galen and Imhotep together. What is their shared association in this course?

A. The invention of the internet
B. The translation of Arabic poetry only
C. Modern factory production
D. The history of medicine

14. Who best fits a study card headed "translation of earlier medical learning"?

A. Al-Khwarizmi
B. Plato
C. Pythagoras
D. Hunayn ibn Ishaq

15. A student writes "Baitul Hikmah: House of Wisdom, Baghdad." Which part needs correction?

A. The city only
B. Both the meaning and the city
C. The meaning only
D. Neither the meaning nor the city

16. A historian studies ancient Mesopotamian clay tablets containing prescribed remedies. What do these show?

A. Early recording of medical knowledge
B. The existence of modern vaccination campaigns
C. The use of digital medical files
D. The beginning of steam-powered factories

17. Which pairing correctly links a scholar with a medical work?

A. Ibn Sina - Al-Qanun fi al-Tibb
B. Hunayn ibn Ishaq - Al-Qanun fi al-Tibb
C. Pythagoras - Al-Qanun fi al-Tibb
D. Al-Khwarizmi - Al-Qanun fi al-Tibb

18. Which statement describes an important role of scholars such as Al-Khwarizmi in numeration?

A. Creating numbers with no earlier influences
B. Replacing all mathematics with astronomy
C. Explaining and spreading Hindu-Arabic calculation methods
D. Inventing the Roman numeral system

Section A | Multiple choice

Questions 19-24 / 1 mark each / Choose ONE best answer.

19. A revision card reads "Greek mathematics and number theory." Which name best completes it?

A. Imhotep
B. Galen
C. Pythagoras
D. Hunayn ibn Ishaq

20. Which activity best fits Baghdad as a centre of learning in the course?

A. Developing the modern internet
B. Starting the steam-powered factory system
C. Collecting manuscripts and checking translations
D. Ending contact with Greek and Persian knowledge

21. A lesson links Damascus with practical advances. Which example fits?

A. Online communication networks
B. Computer-controlled factories
C. Electronic medical records
D. Shipbuilding and agricultural techniques

22. A researcher removes an inconvenient result before publishing a report. Which principle is most directly violated?

A. Speed of communication
B. Technical skill
C. Scientific honesty
D. Freedom to choose a research topic

23. In the Islamic framework taught here, beneficial scientific study can be understood as what?

A. A substitute for every religious duty
B. An activity valuable only for income
C. An act of worship when pursued responsibly
D. A pursuit with no ethical obligations

24. A team says, "Our invention works, so its harmful social effects do not matter." Which reply best reflects value-based science?

A. Success must also be judged against ethics and social responsibility
B. Social effects belong outside every research decision
C. Any effective invention is automatically acceptable
D. Only the selling price matters

Section A | Multiple choice

Questions 25-30 / 1 mark each / Choose ONE best answer.

25. A company uses a prohibited method to achieve a useful technological goal. How should this be assessed in the Islamic framework?

A. A useful goal does not make an unethical method acceptable

B. Ethics applies only after the product is sold

C. The result alone determines whether the action is right

D. The method becomes acceptable if profits rise

26. Which response shows a scientific characteristic identified in the course?

A. Rely only on a person's status

B. Use logical reasoning to examine the claim

C. Avoid asking for supporting evidence

D. Accept the claim because it is fashionable

27. In the criticism attributed to Richard Dawkins in the course, what is the central concern?

A. Using mathematics to describe nature

B. Accepting authority or faith in place of evidence

C. Allowing experiments to be repeated

D. Collecting too many observations

28. A student explains Tawhid as "the oneness of God." How should this definition be marked?

A. Correct

B. Incorrect: it means the authority of scientists

C. Incorrect: it means technological progress

D. Incorrect: it means separation of all knowledge

29. Which statement best fits the Roman Catholic position summarized in this course?

A. Science and religion must always contradict

B. Scientific study always requires rejecting faith

C. Religion makes every experiment unacceptable

D. Science and religion can exist in harmony

30. A scientist publishes full results and considers how an invention affects users. Which two commitments are visible?

A. Profit and speed only

B. Popularity and authority

C. Secrecy and unlimited freedom

D. Scientific honesty and social responsibility

Section B | Structured response

20 marks in total / Answer every question. Use the marks to guide the amount of detail.

1. Ethics in a research decision [2 marks]

A developer says, "If a device performs well, we do not need to consider its effects on society." Explain why the Islamic approach to science would reject this statement. Give TWO clear points.

2. Two centres of learning [4 marks]

A museum needs captions for displays about Damascus and Baghdad. For EACH city, state ONE practical or scholarly development and explain ONE related benefit for learning or society.

3. How a knowledge centre works [5 marks]

Imagine you are preparing a five-point guide to Baitul Hikmah. State FIVE distinct functions that supported the growth or sharing of knowledge.

Section B | Structured response

20 marks in total / Answer every question. Use the marks to guide the amount of detail.

4. Scholars and contributions [3 marks]

Complete the following study cards with ONE accurate contribution for each scholar: (a) Al-Khwarizmi, (b) Ibn Sina, (c) Al-Biruni.

5. Three stages of technological change [6 marks]

Consider these workplaces: A uses hand tools and skilled manual work; B uses steam-powered factory machines; C uses computers, internet connections and automated data systems. Using the THREE-PHASE model taught in this course, name the phase for EACH workplace and explain ONE defining feature.
