Practice Set C

Mixed revision | October 2026 revision

75 minutes / 50 marks

Name: _____ Section: _____

Original practice questions, not an official examination or an authentic past-year paper. Answer ALL 30 MCQs in Section A and ALL 5 structured questions in Section B.

Suggested timing: Section A 35 min | Section B 35 min | Check 5 min

Section A answer sheet

Question	Answer	Question	Answer	Question	Answer
1		11		21	
2		12		22	
3		13		23	
4		14		24	
5		15		25	
6		16		26	
7		17		27	
8		18		28	
9		19		29	
10		20		30	

Score: Section A _____ / 30 Section B _____ / 20 Total _____ / 50

How to use this paper

Try it before opening the answer guide. For each mistake, write one corrected idea. Use the course's three-phase model when answering technological-evolution questions.

One topic I need to revisit: _____

Section A | Multiple choice

Questions 1-6 / 1 mark each / Choose ONE best answer.

01. A community has too few trained people to maintain a safe water system. Which concept supports training enough specialists?

A. Fardu kifayah
B. Scientific freedom without responsibility
C. The separation of science from community life
D. Fardu ain for every person to become a specialist

02. Which revision note is correctly matched?

A. Techne: Latin root meaning knowledge
B. Scientia: Greek root meaning handiwork
C. Scientia: Latin root associated with knowledge
D. Techne: term meaning scientific dishonesty

03. A claim becomes popular online, but nobody provides observations or tests. What is the best scientific response?

A. Reject the need for investigation
B. Ask for evidence before accepting it
C. Assume repetition makes it true
D. Treat popularity as proof

04. Which task most closely reflects the original sense of techne?

A. Judging a claim only by its popularity
B. Using craft skills to make a tool
C. Repeating an unsupported rumour
D. Listing the names of rulers

05. A student records what happened during an experiment in clear words. Which intellectual activity is this?

A. Concealment
B. Advertising
C. Description
D. Inspiration

06. Which pair contrasts an empirical activity with a non-empirical category in the course?

A. Observation; experimentation
B. Measurement; observation
C. Inspiration; kashf
D. Measuring a sample; inspiration

Section A | Multiple choice

Questions 7-12 / 1 mark each / Choose ONE best answer.

07. Which statement should be corrected during revision?

A. Education can help prevent ignorance
B. Technology can benefit a community
C. Science is merely worldly knowledge with no religious significance
D. Scientific claims should be examined

08. Which approach is outside the three-item list of philosophy-of-technology approaches used in this course?

A. Ontological
B. Epistemological
C. Sociological
D. Anthropological

09. Which proposed rule conflicts with Islamic technological ethics?

A. Permit injustice whenever it increases efficiency
B. Consider whether methods are halal or haram
C. Evaluate benefits and harmful consequences
D. Recognize social responsibility

10. A student moves from several observations to a broader statement about a pattern. Which activity is illustrated?

A. Private inspiration
B. Advertising
C. Translation
D. Generalization

11. What does the translation movement suggest about scientific development?

A. Earlier learning must always be discarded
B. Knowledge can grow through contact between cultures
C. Translators have no intellectual role
D. Knowledge develops only through isolation

12. According to the course account, which pair of peoples is associated with Hajr, later known as Mada'in Salih?

A. Greeks and Romans
B. Sabaeans and Himyarites
C. Thamud and Nabataeans
D. Akkadians and Assyrians

Section A | Multiple choice

Questions 13-18 / 1 mark each / Choose ONE best answer.

13. Which list contains three medical figures from the early-civilization overview?

A. Al-Khwarizmi, Al-Biruni, Pythagoras
B. Hippocrates, Galen, Imhotep
C. Plato, Pythagoras, Al-Khwarizmi
D. Aristotle, Plato, Pythagoras

14. A revision table accidentally labels Hunayn ibn Ishaq as the author of The Canon of Medicine. What correction is needed?

A. Describe The Canon as a book on steam engines
B. Assign The Canon to Ibn Sina and link Hunayn to translation
C. Remove Hunayn from the history of scholarship
D. Assign The Canon to Pythagoras

15. Which activity would help Baitul Hikmah support reliable scholarship?

A. Discard manuscripts without studying them
B. Reward translators for changing the original meaning
C. Prevent scholars from consulting books
D. Compare translated material with its source

16. A student must distinguish Damascus from Baghdad. Which pairing best fits the source?

A. Damascus: internet networks; Baghdad: steam factories
B. Damascus: digital automation; Baghdad: online learning
C. Damascus: modern satellites; Baghdad: electronic banking
D. Damascus: shipbuilding; Baghdad: manuscript and translation activity

17. Why is a clay tablet containing a prescribed remedy relevant to the history of science?

A. It demonstrates the invention of computers
B. It proves the existence of modern clinical trials
C. It records an early form of medical knowledge
D. It shows that medical knowledge never changed

18. Which scholar is most appropriate for a project on algebra and calculation?

A. Imhotep
B. Galen
C. Hunayn ibn Ishaq
D. Al-Khwarizmi

Section A | Multiple choice

Questions 19-24 / 1 mark each / Choose ONE best answer.

19. Which note correctly summarizes Al-Biruni's contribution in the source?

A. Astronomy and mathematical or geographical measurement
B. Invention of the Roman numeral system
C. Creation of the modern internet
D. Authorship of The Canon of Medicine

20. A library trains translators and makes books available for study. What wider outcome does this support?

A. The removal of expertise from society
B. A culture of learning and access to knowledge
C. An end to all independent thought
D. The replacement of education by secrecy

21. Which statement about Pythagoras fits the course?

A. He is associated with Greek mathematics and numbers
B. He developed steam-powered factories
C. He led the Arabic medical translation movement
D. He authored The Canon of Medicine

22. A scientist keeps complete records but changes the final report to please a sponsor. Which assessment is correct?

A. The final report still violates scientific honesty
B. Only successful results need accurate reporting
C. Good records automatically make any report honest
D. Sponsor approval replaces the need for accuracy

23. Which statement best explains value-based scientific work in the Islamic framework?

A. Evidence is unnecessary when intentions are good
B. Every scientific result is a matter of personal taste
C. Scientific activity is guided by ethical principles and responsibility
D. Researchers may use any method if a goal is useful

24. A team claims that helping society permits it to use dishonest methods. Which response is most appropriate?

A. Honesty matters only when a project fails
B. Good intentions cancel every ethical duty
C. A beneficial purpose does not justify dishonest methods
D. Success makes every method permissible

Section A | Multiple choice

Questions 25-30 / 1 mark each / Choose ONE best answer.

25. Which pair accurately connects a concept with its meaning?

A. Tawhid - the oneness of God

B. Tawhid - unlimited freedom for scientists

C. Social responsibility - ignoring effects on others

D. Scientific honesty - reporting only successes

26. Which student response demonstrates logic in scientific discussion?

A. "It must be true because it has many likes."

B. "Does this conclusion follow from the evidence?"

C. "A famous person said it, so no check is needed."

D. "We should never question an existing claim."

27. A student says scientific study can count as worship. Which qualification best fits the Islamic framework?

A. It automatically replaces all other obligations

B. It must produce wealth to have value

C. It should avoid all practical benefits

D. Its purpose and conduct should be ethically responsible

28. Which contrast reflects the two views presented in the course?

A. Both views define science as worship of technology

B. Dawkins rejects all evidence; the Catholic summary rejects all science

C. Both views require banning experiments

D. Dawkins raises an evidence concern; the Catholic summary allows harmony

29. A researcher chooses a topic freely but remains accountable for harmful methods. What does this show?

A. Scientific freedom is linked to social responsibility

B. Responsibility applies only to religious teachers

C. Scientific freedom removes all obligations

D. Ethics makes every research project impossible

30. Which research team best combines scientific method and Islamic scientific ethics?

A. The team chooses conclusions before observing

B. The team accepts a sponsor's opinion as its only evidence

C. The team hides failures to protect its reputation

D. The team tests claims and reports all relevant results truthfully

Section B | Structured response

20 marks in total / Answer every question. Use the marks to guide the amount of detail.

1. Choose the right scholar [3 marks]

Name the Muslim scholar most strongly associated with EACH study topic: (a) algebra and calculation; (b) Al-Qanun fi al-Tibb; (c) astronomy and geographical measurement. Use a different scholar each time.

2. Explain a changing workshop [6 marks]

A workshop first relies on handmade tools, later introduces steam-powered machines, and finally uses computers with connected automated systems. Describe these changes using the THREE technological phases in the course. For EACH phase, give the phase name and explain the main technological feature.

3. Evaluate an incomplete definition [2 marks]

A student writes: "Islamic science is value-based, so good intentions are enough even if the research harms people." Correct this statement using TWO distinct points.

Section B | Structured response

20 marks in total / Answer every question. Use the marks to guide the amount of detail.

4. Plan a short exhibition on Baitul Hikmah [5 marks]

Give FIVE distinct statements for an exhibition explaining how Baitul Hikmah helped knowledge to be preserved, checked, developed or shared. Each statement must identify a different function.

5. Two cities, two different strengths [4 marks]

Write TWO accurate achievement statements for Damascus and TWO for Baghdad. Keep the achievements for each city distinct.
